

The Rosenblum SEED LIBRARY

Hammond Branch

Borrow • Grow • Share

We invite you to help make our world a little greener with the Rosenblum Seed Library.

Here's How the Seed Library Works:

- The seed library will contain 50 varieties of vegetable and herb seeds.
- Adult patrons, with a valid library card, will be able to "check out" 3 different seed packets every 2 weeks. You may not take 3 packets of the same seed.
- Packets will contain planting instructions along with enough seeds to grow 1-3 plants.
- Seeds are not to be returned. Show us your plants! Head to the Tangi Facebook page and post a pic of your growing sprouts from the seed library.

How to Plant a Fall Vegetable Garden in Louisiana:

In Louisiana, we have plenty of great fall gardening opportunities that you can take advantage of to put fresh vegetables on your table.

Herbs can be Grown Indoors

Be sure to check light and moisture requirements.

Choose the Right Crops to Ensure Maximum Production

Timing is key when choosing fall crops

Be sure to check light and moisture requirements.

In **September**, the best crops to plant are root crops such as:

Spinach • Broccoli • Cilantro • Brussel sprouts

As **October** approaches, you can begin to seed late root crops such as:

Kale • Kohlrabi • Greens • Loose-head lettuce
Garlic • Shallots • Cabbage • Chinese Cabbage

Pay Attention to Soil Moisture

It's important to note extended hot and dry weather spells.

Happy Gardening
